

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 Claim 1 (original): Portable surface treating apparatus comprising a shaft part (12) with a handle part
2 (13a0 by means of which the apparatus can be guided on the surface to be cleaned and a frame structure
3 (22) having several rolls (29, 31) about which an endless conveyor belt (27) for liquid and dirt particles
4 is arranged characterized in that a portion of the belt between the rolls (29, 21) abuts the surface and is
5 placed such that it is mainly parallel to the surface the apparatus being provided with a scratching means
6 (41) abutting the conveyor belt (27) and removing liquid and dirt particles from the belt.

1 Claim 2 (original): Apparatus according to claim 1 characterized in that the frame structure comprises
2 a mainly flat wall portion (26) that the conveyor belt (27) abuts and that is mainly parallel to the surface.

1 Claim 3 (currently amended): Apparatus according to ~~any of the preceding claims~~ claim 1 characterized
2 in that the frame structure is box shaped and encloses an electric motor (36) with a drive shaft (37) that
3 by means of a gear transmits the driving motion of the drive shaft to at least one of the rolls (31).

1 Claim 4 (currently amended): Apparatus according to ~~any of the preceding claims~~ claim 1 characterized
2 in that the frame structure supports a removable container part (39) in which liquid and dirt particles are
3 collected.

1 Claim 5 (currently amended): Apparatus according to ~~any of the preceding claims~~ claim 1 characterized
2 in that the frame structure (22) supports a rocker arm (52) that is provided with an eccentrically supported
3 roll (54) that is pressed against and rotates by means of the conveyor belt (27) the rocker arm being

4 connected to and driving a pump (45).

1 Claim 6 (original): Apparatus according to claim 5 characterized in that the pump (45) is a membrane
2 pump that is integrated with a pump housing that is placed in the container part (44) the pump housing
3 being provided with a liquid inlet (46) and a liquid outlet to which a check valve (47) is connected.

1 Claim 7 (original): Apparatus according to claim 6 characterized in that a filter (51) is placed
2 immediately before the liquid inlet.

1 Claim 8 (currently amended): Apparatus according to ~~any of the preceding claims~~ claim 1 characterized
2 in that the frame structure comprises at least two parts (22a, 22b) that are turnable with respect to one
3 another and that when the parts are aligned with one another constitute a track for the conveyor belt (27)
4 and which when the parts are angled with respect to one another admits that the conveyor belt is removed
5 from the track.

1 Claim 9 (currently amended): Apparatus according to ~~any of the preceding claims~~ claim 1 characterized
2 in that the conveyor belt comprises a support layer (27b) with an outer micro fibre layer (27a).

1 Claim 10 (currently amended): Apparatus according to ~~any of the preceding claims~~ claim 1 characterized
2 in that it comprises a removable container for cleaning liquid (16) and a removable collecting container
3 (17) for dirty liquid the container for cleaning liquid being connectable to a nozzle in order to directly
4 or indirectly supply a cleaning liquid to the surface.
